force I dimension

omega.7 haptic device

force feedback interface

With its unique **active grasping** extension, the **omega.7** is the most versatile haptic device available. Its end-effector covers the **natural range of motion** of the human hand and is compatible with **bi-manual teleoperation** console design. The combination of **full gravity compensation** and **driftless calibration** contributes to greater user comfort and accuracy. Conceived and manufactured in Switzerland, the omega.7 is designed for demanding applications where **performance and reliability** are critical.

applications

The **omega.7** provides 3D active force-feedback, rotation sensing and active grasping for a wide range of applications:

- > medical and space robotics
- > micro and nano manipulators
- > teleoperation consoles
- virtual simulations
- training systems
- > research

force I dimension

omega.7

workspace translation Ø 160 x 110 mm

rotation 240 x 140 x 180 deg

grasping 25 mm

forces translation 12.0 N

grasping \pm 8.0 N

resolution translation < 0.01 mm

rotation 0.09 deg grasping 0.006 mm

stiffness closed-loop 14.5 N/mm

electronics

interface standard USB 2.0

refresh rate up to 4 KHz universal 110V - 240V

software

power

platforms Microsoft Windows XP / Vista / 7 / 8

Windows CE 7

Linux kernel 2.6 / 3.x

Apple OS X QNX 6.5 / 6.6

WindRiver VxWorks 6.3 / 6.8 / 6.9

software haptic SDK

robotic SDK

features

structure delta-based parallel kinematics

hand-centered rotations

rotations decoupled from translations

active gravity compensation

calibration automatic

driftless

user input 1 haptic programmable button

safety velocity monitoring

electromagnetic damping

option right- or left-handed
